### Reference letter

This is to certify that Mr. Bartłomiej Tatara, a managing director at the company trading as Fomach, supervised implementation of the project named "**Dismantling of a pneumatic transport system of HDPE granules**" at our chemical plant in the year 2017.

Work carried out by Fomach as part of the above project was consistently characterised by high quality. Fomach's compliance with the rules for occupational safety should be particularly emphasised here. The employees of Fomach, including Mr. Tatara, demonstrated deep and comprehensive specialist knowledge, and were capable of using it effectively in practice. The agreed objectives (in terms of safety, quality and time schedule) were conscientiously pursued and achieved. The outputs of Fomach's work were always characterized by *superior* quality, even under adverse conditions or when requirements changed.

We could be absolutely confident of Fomach's staff competence and reliability at every moment of our successful cooperation.

We thank you for efficient cooperation and wish your every success in the future.

Best regards

*[signature]*

Michael Freutsmiedl
