### **Re: Letter of Reference**

FOMACH Sp z o.o. Sp. K. between August 2013 and January 2014 performed a task related to the installation of dust extraction system of the boiler WR-25 in heat and power plant ECO S.A. in Opole at Harcerska 15.

#### The project covered:

##### 1) Construction and mechanical works:

- design and construction of foundations for industrial fans
- assembly of steel structure along with auxiliary devices (total weight - approx. 48 tons)
- thermal insulation along with protective aluminium sheets

##### 2) Installation of electric wiring system and ICA:

- supply and installation of complete power supply and control system: incomer panel cabinet, control gear cabinet, along with wiring
- integration of new control system with the existing CHANCE 2000 system

The above-mentioned works were performed on time and with utmost diligence.

With best regards,

Director of Asset Management, Wojciech Zachariasiewicz
